## Kids Escaping Drugs: Face 2 Face in the Workplace

We've all heard the frightening reports of the growing overdose epidemic in Western New York and maybe tragedy has already struck close to home. Most people say they feel helpless to solve the problem, and worry about their neighborhoods and their children.

Face 2 Face in the Workplace is a program that establishes a convenient and stigma proof way to educate parents and concerned community members about the trends and consequences of substance use and addiction. Our presenters include an addiction counselor as well as a parent of an adolescent in recovery to deliver this strong message. Additionally, this program provides information about treatment resources available in the WNY community.

### **The goals of the program include:**

- Educating families and community members of the prevalence and harmful effects of alcohol and drug experimentation, use, and dependence among adolescents.
- Providing resources for substance abuse prevention, treatment, and recovery.
- Enhancing community work organizations' Employee Assistance Programs and providing companies an opportunity to encourage work-life balance among their employees.

Face 2 Face in the Workplace brings the pro-active message of sobriety, adolescent early identification, and intervention and treatment to area adults during their work day.
