Advanced degree offerings prep students for fast-growing jobs across the U.S.

Mar 14, 2022, 6:00am EDT

Buffalo is in a good position when it comes to the fastest-growing jobs that require advanced degrees in the United States.

Of the top 10 jobs, seven involve health care, according to U.S. Bureau of Labor Statistics' employment percent-change projections for 2020 through 2030.

Health-care employers draw the best health care-related educators...
Buffalo colleges offer degrees in nursing, health to prepare for fastest-growing fields. To local schools, which help to attract students who may find local jobs at those employers. Then the cycle continues, according to Timothy Glass, state labor department’s Western New York labor market analyst.

“Health care is definitely considered a significant industry in this region,” he said.

Computer and information research scientists are rank in the top 10.

Computer-related jobs continue to expand as people increase their use of technology, also a growing industry in the Buffalo area, Glass said.

The latest employment projections for Western New York for 2018-2028 show five, all health care, of the top 10 fastest growing jobs that require advanced education matching up with the nation's top 10.

Those five roles are: physician assistants, nurse practitioners, post-secondary nursing instructors and teachers, speech-language pathologists and post-secondary health specialties teachers.
