

SUBJECT: ITS Software requests \*Important – Please read\*

ITS will be preparing the campus computer labs for the spring semester. To do this efficiently we need your input.

Please use the Google form below to review the basic list of software that will be included in the lab builds and submit your requests for additional software **before January 3rd**. This includes podium computers in classrooms. Requests received after this date may not be able to be accommodated in a timely fashion.

[https://docs.google.com/forms/d/e/1FAIpQLSfGLFclN8egdJOKuXHL1BuVw-xz5TUM84bm5qXM6KPZ7Syyfw/viewform?usp=sf\\_link](https://docs.google.com/forms/d/e/1FAIpQLSfGLFclN8egdJOKuXHL1BuVw-xz5TUM84bm5qXM6KPZ7Syyfw/viewform?usp=sf_link)

We are going to expand the ITS web pages with computer and software recommendations for students. If we know these software needs we can better recommend computer specifications for incoming freshmen and current students if they choose to bring a laptop with them to campus. With these recommendations we can also include a list of software that particular academic programs may need.

We will be expanding the ITS “New Computer” pages in the weeks to come. This is a great resource for students, staff and faculty to explore options for personal computer purchases and recommendations. Links to purchase software and hardware for home use are already available and will be expanded based on some of this information. Feel free to check it out...
